Ecoates17@hotmail.com

Developer with 3 years of experience in web app development and testing. Created features in an application that was transitioning from an in-house application to a product to be sold to customers. Experience with databases in both NoSQL and SQL in both web applications and system applications. Lead tester for web applications using Jest

PROFESSIONAL EXPERIENCE

IMA Ltd.

Web Developer

Tillsonburg, ON

April 2023–March 2024

- Met with team lead to determine features that needed to be developed, the priority they were, and what was best for me to be tasked with
- Created features that directly interacted with both front-end and back-end, meaning I had to ensure that the feature seamlessly integrated into the Webpage as well as sent and received the data correctly from the database
- Managed data coming and going from the NoSQL database to ensure the data was received and parsed correctly while data being sent back was in the proper format for the database to keep
- Reported to team lead and head engineer to update them on progress of tasks and had to give accurate timelines on when they were planned to be completed

IMA Ltd.

Test Automation Architect

Tillsonburg, ON

April 2024–December 2024

- Tasked by team lead and lead engineer to create and manage a test suite that would test the entire web application from top to bottom
- I had to research best testing frameworks to use for the suite as well as plan automated testing for future updates, I also had to determine workflows and what tests needed to be done to complete said workflows
- Built proper test suite structure and tested application focusing on priority and expected workflows then branching out to capturing edge cases
- Tested both front-end and back-end of the application as well as insured that integration tests were abundant and fulfilled every instance of interaction between both sides of the application

EDUCATION

Conestoga College Institute of Technology, Waterloo, ON
Honours BSc Computer Science (Big Data, Co-op) (2025)
